ACLA ADDS THREE NEW LABORATORIES TO MEMBERSHIP

AUREON LABORATORIES, COMBIMATRIX MOLECULAR DIAGNOSTICS, WOODBURY CLINICAL LABORATORY JOIN GROWING ASSOCIATION

Washington, D.C. – The American Clinical Laboratory Association (ACLA) announced today that three new laboratories have joined ACLA’s membership ranks, bringing its membership to 27 laboratories, the largest in the association’s 35 year history. The new members are Aureon Laboratories, Inc. (Yonkers, NY), CombiMatrix Molecular Diagnostics (Irvine, CA), and Woodbury Clinical Laboratory (Lebanon, TN).

“With these new members, ACLA continues to grow in terms of numbers of laboratory members, as well as in the diversity of its membership,” said Alan Mertz, President of ACLA. “ACLA increasingly represents the full breadth of the laboratory industry which includes local, regional, national, esoteric, hospital-based, pathology and ESRD laboratories.”

Aureon Laboratories applies “Systems Pathology” to develop predictive clinical tests for cancer care as well as to facilitate bio-pharmaceutical research and development. Aureon’s personalized predictive pathology technology has the potential to significantly advance the state of clinical medicine.

CombiMatrix Molecular Diagnostics is a clinical laboratory dedicated to improving patient health by turning important discoveries in human genetics into high value diagnostic tests.

Woodbury Clinical Laboratory is a local, independently owned, medical diagnostic testing laboratory dedicated to improving the quality of care for patients by providing the most comprehensive laboratory testing available. Woodbury, established in 1988, is a regional laboratory serving all of Tennessee as well as North Georgia and Southern Kentucky.

ACLA represents the leading local, regional, and national clinical laboratories.
